EDUCATION

Georgia State University

Expected May 2027

Bachelor of Science in Computer Science • **GPA: 3.75/4.0**

- Coursework: Distributed Systems, Operating Systems, Database Systems, Computer Networks, Data Structures
- Honors: Presidential Scholarship, Anita Andrew Fellowship, Roxie Alexander Memorial Award

EXPERIENCE

Google | Software Engineer Intern – Chrome Browser

May 2025 – Aug 2025

- Designed **C++ IPC transport layer** with Protocol Buffers – selected Protobuf over custom serialization for schema evolution and cross-language compatibility; shipped to Chrome stable serving **3B+ active users** at **sub-50ms p99, 10K+ req/sec**
- Identified settings navigation as p99 bottleneck at 1,200ms; designed **lock-free concurrent trie** eliminating mutex contention – **96% latency reduction**, zero production regressions
- Architected event-driven TypeScript/React system with observer pattern decoupling UI state propagation – accelerated feature delivery **68%** across **25K+ lines** of Chromium at **95% test coverage**
- Delivered design documents and code reviews adopted by senior Chrome infrastructure engineers into production branch

TiMoto AI | Software Engineer

Sep 2025 – Present

- Led backend, cloud infrastructure, and ML serving for a 3-person engineering team – designed, deployed, and operated **distributed production systems** end-to-end
- Architected **vLLM inference engine with PagedAttention** – eliminated KV cache memory fragmentation under concurrent load; deployed with continuous batching achieving **zero OOM failures** at production traffic and **sub-50ms p99**
- Designed and maintained **gRPC inter-service layer**; resolved production deadlock under concurrent calls by tracing shared resource acquisition conflicts and redesigning call sequencing – **100% evaluation success rate**
- Architected multi-AZ ECS Fargate with **Terraform IaC**, CloudWatch observability, and circuit breaker pattern – **99.9% uptime, 44% cost reduction** (\$40–60/month); auto-rollback on health check failure

Develop for Good | Software Engineer Intern

May 2024 – Aug 2024

- Designed stateless BaaS on AWS – selected JWT over session auth for horizontal scalability; auto-scaling supporting **500+ concurrent users, 90% deployment time reduction** via CI/CD (GitHub Actions)
- Diagnosed N+1 query bottleneck degrading response to 3s+ on large datasets; redesigned with PostgreSQL indexing achieving **sub-100ms** for 10,000+ records

PROJECTS

Pulumi – Contributor | Go, TypeScript, IaC

github.com/pulumi/pulumi

- Submitted Go CLI features and bug fixes enabling multi-cloud (AWS/Azure/GCP) provisioning – under review by core maintainers
- Analyzed **Raft/Paxos consensus** in distributed state synchronization layer – studied linearizability and correctness under concurrent operations and partial failures

SKILLS

Systems & Languages: C++, Go, Python, TypeScript, Java, Rust, SQL, Bash – IPC, Protocol Buffers, lock-free data structures

Distributed Systems: gRPC, Circuit breakers, Exactly-once semantics, Fault tolerance, Multi-AZ, Event-driven architecture, Kafka

ML & AI Infrastructure: vLLM, PagedAttention, Continuous Batching, LoRA/QLoRA, PyTorch, LangChain, LLM inference SLOs

Cloud & Infrastructure: AWS (ECS Fargate, EKS, EC2, S3, RDS), Terraform, K8s, Docker, CI/CD, CloudWatch, Prometheus, Grafana

Frameworks & Databases: Django, FastAPI, Node.js, React, REST APIs, PostgreSQL, Redis, MongoDB

AI Dev Tools: Claude Code, GitHub Copilot, Codex, Cursor
