EDUCATION

Georgia State University

Expected May 2027

Bachelor of Science in Computer Science • GPA: 3.75/4.0

- Coursework: Distributed Systems, Operating Systems, Database Systems, Computer Networks, Data Structures
- Honors: Presidential Scholarship, Anita Andrew Fellowship, Roxie Alexander Memorial Award

EXPERIENCE

Google | Software Engineer Intern – Chrome Browser

May 2025 – Aug 2025

- Diagnosed settings navigation as p99 bottleneck at 1,200ms; designed and implemented **lock-free concurrent trie search** eliminating mutex contention – **96% latency reduction**, zero production regressions, shipped to Chrome stable
- Designed **C++ IPC transport layer** with Protocol Buffers – selected Protocol Buffers over custom serialization for schema evolution and cross-language compatibility; shipped to Chrome stable channel serving **3B+ active users** at **sub-50ms p99**, **10K+ req/sec**
- Architected event-driven TypeScript/React system with observer pattern decoupling UI state propagation – accelerated feature delivery **68%** across **25K+ lines** of Chromium at **95% test coverage**
- Collaborated with Chrome infrastructure team to deliver design documents and code reviews adopted into production branch by senior Chrome engineers

TiMoto AI | Software Engineer

Sep 2025 – Present

- Traced production **gRPC deadlock** to circular resource acquisition under concurrent calls; redesigned call sequencing enforcing consistent lock ordering – **100% evaluation success rate** at **sub-50ms p99**
- Led backend, cloud infrastructure, and ML serving for a 3-person engineering team – designed, deployed, and operated **distributed production systems** end-to-end
- Architected **vLLM inference engine with PagedAttention** for LLM serving – eliminated KV cache memory fragmentation under concurrent load; deployed with continuous batching achieving **zero OOM failures** at production traffic
- Architected multi-AZ ECS Fargate with **Terraform IaC**, CloudWatch observability, and circuit breaker pattern – **99.9% uptime**, **44% cost reduction** (\$40–60/month); auto-rollback on health check failure

Develop for Good | Software Engineer Intern

May 2024 – Aug 2024

- Diagnosed N+1 query bottleneck degrading response to 3s+ on large datasets; redesigned with PostgreSQL indexing achieving **sub-100ms** for 10,000+ records
- Designed stateless BaaS on AWS – selected JWT over session auth for horizontal scalability; auto-scaling policy supporting **500+ concurrent users**, **90% deployment time reduction** via CI/CD (GitHub Actions)

PROJECTS

Pulumi – Contributor | Go, TypeScript, IaC

github.com/pulumi

- Analyzed **Raft/Paxos consensus** in distributed state synchronization layer – studied linearizability guarantees and correctness under concurrent operations and partial failures
- Submitted Go CLI features and bug fixes enabling multi-cloud (AWS/Azure/GCP) provisioning – under active review by core maintainers

SKILLS

Languages: C++, Java, Python, Go, TypeScript, JavaScript, SQL, Bash, Rust

Distributed Systems: Lock-free data structures, gRPC, Protocol Buffers, Circuit breakers, Exactly-once semantics, Fault tolerance, Multi-AZ, Event-driven architecture

Cloud & Infrastructure: AWS (ECS Fargate, EKS, EC2, S3, RDS), Terraform, K8s, Docker, CI/CD, CloudWatch, Prometheus, Grafana, GCP

ML & AI Infrastructure: vLLM, PagedAttention, Continuous Batching, LoRA/QLoRA, PyTorch, LangChain, LLM-as-a-judge evaluation

Frameworks & Databases: Django, FastAPI, Node.js, React, REST APIs, PostgreSQL, Redis, MongoDB

AI Dev Tools: Claude Code, GitHub Copilot, Codex, Cursor
