EDUCATION

Georgia State University

Expected May 2027

Bachelor of Science in Computer Science • GPA: 3.75/4.0

- Coursework: Distributed Systems, Operating Systems, Database Systems, Computer Networks, Data Structures
- Honors: Presidential Scholarship, Anita Andrew Fellowship, Roxie Alexander Memorial Award

EXPERIENCE

TiMoto AI | Software Engineer

Sep 2025 – Present

- Led backend, cloud infrastructure, and ML serving for a 3-person engineering team – designed, deployed, and operated **distributed production systems** end-to-end
- Architected multi-AZ ECS Fargate with **Terraform IaC**, CloudWatch observability, and circuit breaker pattern – **99.9% uptime**, **44% cost reduction** (\$40–60/month); auto-rollback on health check failure
- Maintained distributed production systems across gRPC, PostgreSQL, and ML serving layers – triaged and resolved incidents via root-cause analysis, **documented runbooks**, applied post-mortem learnings; participated in **on-call rotation**
- Designed and maintained **gRPC inter-service layer**; resolved production deadlock under concurrent calls by tracing shared resource acquisition conflicts and redesigning call sequencing – **100% evaluation success rate** at **sub-50ms p99**
- Architected **vLLM inference engine with PagedAttention** for LLM serving – eliminated KV cache memory fragmentation; deployed with continuous batching achieving **zero OOM failures** at production traffic

Google | Software Engineer Intern – Chrome Browser

May 2025 – Aug 2025

- Designed **C++ IPC transport layer** with Protocol Buffers – selected Protocol Buffers over custom serialization for schema evolution and cross-language compatibility; shipped to Chrome stable channel serving **3B+ active users** at **sub-50ms p99**, **10K+ req/sec**
- Identified settings navigation as p99 bottleneck at 1,200ms; designed and implemented **lock-free concurrent trie search** eliminating mutex contention – **96% latency reduction**, zero production regressions
- Collaborated with Chrome infrastructure team to deliver design documents and code reviews at **95% test coverage**; changes adopted into production branch reviewed by senior Chrome engineers
- Architected event-driven TypeScript/React system with observer pattern decoupling UI state propagation – accelerated feature delivery **68%** across **25K+ lines** of Chromium

Develop for Good | Software Engineer Intern

May 2024 – Aug 2024

- Designed stateless BaaS on AWS – selected JWT over session auth for horizontal scalability; auto-scaling policy supporting **500+ concurrent users**; configured **GitHub Actions CI/CD pipeline** with deployment gates achieving **90% deployment time reduction**
- Diagnosed N+1 query bottleneck degrading response to 3s+ on large datasets; redesigned with PostgreSQL indexing achieving **sub-100ms** for 10,000+ records

PROJECTS

Pulumi – Contributor | Go, TypeScript, IaC

github.com/pulumi

- Submitted Go CLI features and bug fixes enabling multi-cloud (AWS/Azure/GCP) provisioning – under active review by core maintainers
- Analyzed **Raft/Paxos consensus** in distributed state synchronization layer – studied linearizability guarantees and correctness under concurrent operations and partial failures

SKILLS

Reliability & Observability: CloudWatch, Prometheus, Grafana, circuit breakers, on-call rotation, runbooks, incident response, auto-rollback

Cloud & Infrastructure: AWS (ECS Fargate, EKS, EC2, S3, RDS), Terraform, K8s, Docker, CI/CD (GitHub Actions), multi-AZ, GCP

Distributed Systems: gRPC, Protocol Buffers, exactly-once semantics, fault tolerance, Kafka, event-driven architecture

Languages: C++, Python, Go, TypeScript, Java, JavaScript, SQL, Bash, Rust

Frameworks & Databases: Django, FastAPI, Node.js, React, REST APIs, PostgreSQL, Redis, MongoDB

ML & AI Infrastructure: vLLM, PagedAttention, Continuous Batching, LoRA/QLoRA, PyTorch, LLM-as-a-judge evaluation

AI Dev Tools: Claude Code, GitHub Copilot, Codex, Cursor
