EDUCATION

Georgia State University

Expected May 2027

Bachelor of Science in Computer Science • **GPA: 3.75/4.0**

- Coursework: Distributed Systems, Operating Systems, Database Systems, Computer Networks, Data Structures
- Honors: Presidential Scholarship, Anita Andrew Fellowship, Roxie Alexander Memorial Award

EXPERIENCE

TiMoto AI | Software Engineer

Sep 2025 – Present

- Primary engineer on 3-person team owning full-stack architecture – backend services, cloud infrastructure, and ML serving for production AI platform
- Designed gRPC inter-service layer; traced and resolved production deadlock by identifying shared resource acquisition conflicts; **100% evaluation success rate at sub-50ms p99**
- Architected vLLM inference engine with PagedAttention; eliminated KV cache fragmentation; **zero OOM failures** at production traffic
- Multi-AZ ECS Fargate with Terraform IaC, CloudWatch, circuit breaker; **99.9% uptime, 44% cost reduction**; automated rollback on health-check failure

Google | Software Engineer Intern – Chrome Browser

May 2025 – Aug 2025

- Implemented TypeScript/React observer pattern decoupling UI state across **25K+ lines** of Chromium codebase; **68% feature delivery acceleration; 95% test coverage**; design adopted into production branch
- Built C++ IPC transport layer with Protocol Buffers shipped to Chrome stable serving **3B+ active users; sub-50ms p99, 10K+ req/sec**
- Engineered lock-free concurrent trie eliminating mutex contention; **96% latency reduction**, zero regressions across all browser benchmarks
- Authored design documents reviewed by senior Chrome infrastructure engineers; proposed changes adopted into production branch

Develop for Good | Software Engineer Intern

May 2024 – Aug 2024

- Designed stateless BaaS on AWS – selected JWT over session auth for horizontal scalability; auto-scaling policy supporting **500+ concurrent users, 90% deployment time reduction** via CI/CD (GitHub Actions)
- Diagnosed N+1 query bottleneck degrading response to 3s+ on large datasets; redesigned with PostgreSQL indexing achieving **sub-100ms** for 10,000+ records

PROJECTS

Pulumi – Contributor | Go, TypeScript, IaC

github.com/pulumi

- Submitted Go CLI features and bug fixes enabling multi-cloud (AWS/Azure/GCP) provisioning – under active review by core maintainers
- Analyzed **Raft/Paxos consensus** in distributed state synchronization layer – studied linearizability guarantees and correctness under concurrent operations and partial failures

SKILLS

Languages: TypeScript, Python, C++, Go, Java, JavaScript, SQL, Bash, Rust

Frameworks & Databases: React, Django, FastAPI, Node.js, REST APIs, PostgreSQL, Redis, MongoDB

Cloud & Infrastructure: AWS (ECS Fargate, EKS, EC2, S3, RDS), Terraform, K8s, Docker, CI/CD, CloudWatch, Prometheus, Grafana, GCP

Distributed Systems: gRPC, Protocol Buffers, Circuit breakers, Exactly-once semantics, Fault tolerance, Kafka, Multi-AZ, Event-driven architecture

ML & AI Infrastructure: vLLM, PagedAttention, Continuous Batching, LoRA/QLoRA, PyTorch, LangChain, LLM-as-a-judge evaluation

AI Dev Tools: Claude Code, GitHub Copilot, Codex, Cursor
