EDUCATION

Georgia State University

Expected May 2027

Bachelor of Science in Computer Science • GPA: 3.75/4.0

- Coursework: Distributed Systems, Operating Systems, Database Systems, Computer Networks, Data Structures
- Honors: Presidential Scholarship, Anita Andrew Fellowship, Roxie Alexander Memorial Award

EXPERIENCE

TiMoto AI | Software Engineer

Sep 2025 – Present

- Architected multi-AZ **ECS Fargate** with **Terraform IaC**, **circuit breaker** pattern, and **CloudWatch + Prometheus + Grafana** observability – **99.9% uptime SLO**, **44% cost reduction** (\$40-60/month); auto-rollback on health check failure; **on-call rotation** with runbooks and post-mortems
- Designed and maintained **gRPC inter-service layer**; debugged production deadlock by tracing shared resource acquisition conflicts and redesigning call sequencing – **exactly-once delivery** at **sub-50ms p99**
- Architected **vLLM inference engine** with **PagedAttention** and **LLM-as-a-judge evaluation pipeline** for production AI workloads – zero OOM failures at production traffic; enables reliable AI search and intelligent assistant workflows
- Led backend development for a 3-person engineering team – **Python (FastAPI/Django)** REST APIs, **PostgreSQL + Redis** data layer, **LLM API integration** (Claude, GPT), **LangChain** orchestration end-to-end

Google | Software Engineer Intern – Chrome Browser

May 2025 – Aug 2025

- Designed **C++ IPC transport layer** with Protocol Buffers – shipped to Chrome stable channel serving **3B+ active users** at **sub-50ms p99**, **10K+ req/sec**; zero post-ship regressions at **95% test coverage**
- Identified settings navigation as p99 bottleneck at 1,200ms; designed and implemented **lock-free concurrent trie search** eliminating mutex contention – **96% latency reduction**, zero production regressions
- Architected event-driven TypeScript/React system with observer pattern – **68% feature delivery acceleration** across **25K+ lines** of Chromium; shipped to **3B+ active users**
- Delivered design documents and code reviews at **95% test coverage**; changes adopted into production branch reviewed by senior Chrome engineers

Develop for Good | Software Engineer Intern

May 2024 – Aug 2024

- Designed stateless BaaS on AWS – selected JWT over session auth for horizontal scalability; auto-scaling policy supporting **500+ concurrent users**, **90% deployment time reduction** via CI/CD (GitHub Actions)
- Diagnosed N+1 query bottleneck degrading response to 3s+ on large datasets; redesigned with **PostgreSQL indexing** achieving **sub-100ms** for 10,000+ records

PROJECTS

Pulumi – Contributor | *Go, Multi-cloud IaC (AWS/Azure/GCP)*

github.com/pulumi

- Submitted **Go CLI features** enabling **multi-cloud K8s and infrastructure provisioning** (AWS/Azure/GCP) – under active review by core maintainers
- Analyzed **Raft/Paxos consensus** in distributed state synchronization layer – studied linearizability guarantees and correctness under concurrent operations and partial failures

SKILLS

Cloud & Infrastructure: AWS (ECS Fargate, EKS, EC2, S3, RDS), GCP, Terraform, Kubernetes, Docker, CI/CD, CloudWatch, Prometheus, Grafana

Distributed Systems: gRPC, Protocol Buffers, Circuit breakers, Exactly-once semantics, Fault tolerance, Multi-AZ, Event-driven architecture, Kafka

Languages: Python, Go, TypeScript, C++, Java, JavaScript, SQL, Bash, Rust

Frameworks & Databases: FastAPI, Django, Node.js, React, REST APIs, PostgreSQL, Redis, MongoDB

ML & AI Infrastructure: vLLM, PagedAttention, Continuous Batching, LLM APIs (Claude, GPT), LangChain, LLM-as-a-judge evaluation, PyTorch

AI Dev Tools: Claude Code, GitHub Copilot, Codex, Cursor
