EDUCATION

Georgia State University

Expected May 2027

Bachelor of Science in Computer Science • **GPA: 3.75/4.0**

- Coursework: Distributed Systems, Operating Systems, Database Systems, Computer Networks, Data Structures
- Honors: Presidential Scholarship, Anita Andrew Fellowship, Roxie Alexander Memorial Award

EXPERIENCE

TiMoto AI | Software Engineer

Sep 2025 – Present

- Built end-to-end **AI product** for a 3-person engineering team – **LLM API integration** (Claude, GPT), **vLLM inference engine with PagedAttention** for zero-OOM serving, **LLM-as-a-judge evaluation pipeline** for automated quality metrics; async ML workflows with **exactly-once delivery at sub-50ms p99**
- Designed **Python (FastAPI/Django) REST APIs** and **PostgreSQL + Redis** data layer – **CloudWatch + Prometheus + Grafana** two-layer observability (infra SLOs + pipeline correctness); **99.9% uptime SLO**; on-call rotation with runbooks and post-mortems
- Designed **gRPC inter-service layer** with durable distributed state – debugged production deadlock by tracing shared resource acquisition conflicts and redesigning call sequencing; **circuit breaker pattern** with auto-rollback; zero data loss at production traffic
- Architected multi-AZ **ECS Fargate with Terraform IaC** – **44% cost reduction** (\$40–60/month); auto-scaling policy; AWS/GCP multi-cloud (ECS Fargate, EKS, EC2, S3, RDS)

Google | Software Engineer Intern – Chrome Browser

May 2025 – Aug 2025

- Architected **event-driven TypeScript/React system** with observer pattern decoupling UI state propagation – **68% feature delivery acceleration** across **25K+ lines** of Chromium at **95% test coverage**; shipped to **3B+ active users**
- Designed **C++ IPC transport layer** with **Protocol Buffers** – selected Protocol Buffers for schema evolution and cross-language compatibility; shipped to Chrome stable at **sub-50ms p99, 10K+ req/sec, 3B+ active users**
- Identified settings navigation as p99 bottleneck at 1,200ms; implemented **lock-free concurrent trie search** eliminating mutex contention – **96% latency reduction**, zero production regressions
- Delivered design documents and code reviews at **95% test coverage**; changes adopted into production branch reviewed by senior Chrome engineers

Develop for Good | Software Engineer Intern

May 2024 – Aug 2024

- Designed stateless BaaS on AWS – selected JWT over session auth for horizontal scalability; auto-scaling policy supporting **500+ concurrent users, 90% deployment time reduction** via CI/CD (GitHub Actions)
- Diagnosed N+1 query bottleneck degrading response to 3s+ on large datasets; redesigned with **PostgreSQL composite indexing** achieving **sub-100ms** for 10,000+ records

PROJECTS

Pulumi – Contributor | *Go, TypeScript, Multi-cloud IaC*

github.com/pulumi

- Submitted **Go CLI features** enabling multi-cloud (AWS/Azure/GCP) provisioning – developer tooling contribution under active review by core maintainers
- Analyzed **Raft/Paxos consensus** in distributed state synchronization layer – studied linearizability guarantees and correctness under concurrent operations and partial failures

SKILLS

Frameworks & Frontend: React, TypeScript, FastAPI, Django, Node.js, REST APIs, PostgreSQL, Redis, MongoDB

ML & AI Infrastructure: vLLM, PagedAttention, Continuous Batching, LLM APIs (Claude, GPT), LangChain, LLM-as-a-judge evaluation, PyTorch

Languages: Python, TypeScript, Go, C++, Java, JavaScript, SQL, Bash, Rust

Distributed Systems: gRPC, Protocol Buffers, Exactly-once semantics, Circuit breakers, Fault tolerance, Multi-AZ, Event-driven architecture

Cloud & Infrastructure: AWS (ECS Fargate, EKS, EC2, S3, RDS), GCP, Terraform, Kubernetes, Docker, CI/CD, CloudWatch, Prometheus, Grafana

AI Dev Tools: Claude Code, GitHub Copilot, Codex, Cursor
