EDUCATION

Georgia State University

Expected May 2027

Bachelor of Science in Computer Science • GPA: 3.75/4.0

- Coursework: Distributed Systems, Operating Systems, Database Systems, Computer Networks, Data Structures
- Honors: Presidential Scholarship, Anita Andrew Fellowship, Roxie Alexander Memorial Award

EXPERIENCE

TiMoto AI | Software Engineer

Sep 2025 – Present

- Primary engineer building an **AI-native product end-to-end** for a 3-person team – **LLM API integration** (Claude, GPT), agentic **LLM-as-a-judge evaluation pipeline**, **LangChain** orchestration, **vLLM inference**; **clean FastAPI REST APIs** and **Protocol Buffers** schemas designed for extensibility
- Built **quality and reliability guardrails** that raise the floor without slowing delivery – CI/CD with auto-rollback on health-check failure, **CloudWatch** + **Prometheus** + **Grafana** observability, circuit breaker pattern; **99.9% uptime SLO**; **gRPC exactly-once delivery**
- Designed **gRPC inter-service layer**; debugged production deadlock by tracing shared resource acquisition conflicts across distributed services and redesigning call sequencing – zero data loss at production traffic; **PostgreSQL** + **Redis** data layer
- Architected multi-AZ **ECS Fargate with Terraform IaC** (AWS/GCP) – **44% cost reduction** (\$40-60/month); ships in a fast-moving 0-to-1 environment with cost and SLO targets

Google | Software Engineer Intern – Chrome Browser

May 2025 – Aug 2025

- Designed **C++ IPC transport layer** with **Protocol Buffers** – selected Protocol Buffers for **schema evolution** and cross-language compatibility (composable, extensible contracts); shipped to Chrome stable at **sub-50ms p99**, **10K+ req/sec**, **3B+ active users**
- Architected event-driven **TypeScript/React** system with observer pattern – **68% feature delivery acceleration** across **25K+ lines** of Chromium at **95% test coverage**; shipped to **3B+ active users**
- Identified settings navigation as p99 bottleneck at 1,200ms; implemented **lock-free concurrent trie search** eliminating mutex contention – **96% latency reduction**, zero production regressions
- Delivered design documents and code reviews at **95% test coverage**; changes adopted into production branch reviewed by senior Chrome engineers

Develop for Good | Software Engineer Intern

May 2024 – Aug 2024

- Designed stateless BaaS on AWS – selected JWT over session auth for horizontal scalability; auto-scaling policy supporting **500+ concurrent users**, **90% deployment time reduction** via CI/CD (GitHub Actions)
- Diagnosed N+1 query bottleneck degrading response to 3s+ on large datasets; redesigned with **PostgreSQL composite indexing** achieving **sub-100ms** for 10,000+ records

PROJECTS

Pulumi – Contributor | Go, TypeScript, Multi-cloud IaC

github.com/pulumi

- Submitted **Go CLI features** for multi-cloud (AWS/Azure/GCP) provisioning – developer tooling that lowers the barrier for others to build infrastructure safely; under active review by core maintainers
- Analyzed **Raft/Paxos consensus** in distributed state synchronization layer – studied linearizability guarantees and correctness under concurrent operations and partial failures

SKILLS

Languages: Python, TypeScript, Go, C++, Java, JavaScript, SQL, Bash, Rust

ML & AI Infrastructure: LLM APIs (Claude, GPT), LangChain, LLM-as-a-judge evaluation, RAG, vLLM, PagedAttention, Continuous Batching, PyTorch

Frameworks & APIs: FastAPI, Django, Node.js, React, REST APIs, Protocol Buffers, PostgreSQL, Redis, MongoDB

Distributed Systems: gRPC, Exactly-once semantics, Circuit breakers, Fault tolerance, Multi-AZ, Event-driven architecture

Cloud & Infrastructure: AWS (ECS Fargate, EKS, EC2, S3, RDS), GCP, Terraform, Kubernetes, Docker, CI/CD, CloudWatch, Prometheus, Grafana

AI Dev Tools: Claude Code, GitHub Copilot, Codex, Cursor, agentic coding workflows
