EDUCATION

Georgia State University

Expected May 2027

Bachelor of Science in Computer Science • GPA: 3.75/4.0

- Coursework: Distributed Systems, Operating Systems, Database Systems, Computer Networks, Data Structures
- Honors: Presidential Scholarship, Anita Andrew Fellowship, Roxie Alexander Memorial Award

EXPERIENCE

Google | Software Engineer Intern – Chrome Browser

May 2025 – Aug 2025

- Architected event-driven **TypeScript/React** system with observer pattern and **reusable component architecture** – decoupled UI state across **25K+ lines** of Chromium; **68% feature delivery acceleration** at **95% test coverage**; shipped to **3B+ active users**
- Identified p99 bottleneck at 1,200ms; implemented **lock-free concurrent search** – **96% latency reduction**, zero production regressions; performance-first UI engineering mindset
- Built UI on top of complex systems – designed **C++ IPC transport layer** with **Protocol Buffers**; understood full data path from process boundary to TypeScript surface; **sub-50ms p99**, **3B+ users**
- Delivered design documents and drove technical discussions in code reviews with senior Chrome engineers

TiMoto AI | Software Engineer

Sep 2025 – Present

- Primary engineer on 3-person team – built **React** frontend surfaces backed by **Python (FastAPI/Django) REST APIs**; owned features end-to-end from data modeling to UI in a high-growth AI startup
- Built **AI product** infrastructure – **LLM API integration** (Claude, GPT), **LLM-as-a-judge evaluation** pipeline, **LangChain** orchestration, **vLLM** inference serving for production traffic
- Designed **gRPC distributed services** with exactly-once delivery and circuit breaker; **PostgreSQL + Redis** data layer with query optimization; multi-AZ **AWS ECS Fargate** with Terraform; **99.9% uptime SLO**

Develop for Good | Software Engineer Intern

May 2024 – Aug 2024

- Built user-facing web application on **AWS** – JWT auth for horizontal scalability; auto-scaling supporting **500+ concurrent users**, **90% deployment time reduction** via CI/CD (GitHub Actions)
- Diagnosed N+1 query bottleneck degrading response to 3s+; redesigned with **PostgreSQL composite indexing** achieving **sub-100ms** data fetches for 10,000+ records

PROJECTS

Pulumi – Contributor | Go, TypeScript, Open Source

github.com/pulumi

- Submitted **Go CLI features** for multi-cloud (AWS/Azure/GCP) provisioning – open-source developer tooling under active review by core maintainers
- Analyzed **Raft/Paxos consensus** in distributed state synchronization – studied linearizability and correctness under concurrent operations and partial failures

SKILLS

Frontend: React, TypeScript, JavaScript, HTML/CSS, Observer-pattern state management, Reusable components, REST API integration, Performance optimization

Languages: TypeScript, Python, Go, C++, Java, JavaScript, SQL, Bash, Rust

Backend & APIs: Node.js, FastAPI, Django, REST APIs, gRPC, Protocol Buffers, PostgreSQL, Redis, MongoDB

AI & Data: LLM APIs (Claude, GPT), LangChain, vLLM, LLM-as-a-judge evaluation, Data pipelines (batch + real-time)

Cloud & DevOps: AWS (ECS Fargate, S3, RDS), Terraform, Docker, CI/CD (GitHub Actions), CloudWatch, Prometheus, Grafana, GCP

AI Dev Tools: Claude Code, GitHub Copilot, Codex, Cursor
