EDUCATION

Georgia State University

Expected May 2027

Bachelor of Science in Computer Science • **GPA: 3.75/4.0**

- Coursework: Distributed Systems, Operating Systems, Database Systems, Computer Networks, Data Structures
- Honors: Presidential Scholarship, Anita Andrew Fellowship, Roxie Alexander Memorial Award

EXPERIENCE

TiMoto AI | Software Engineer

Sep 2025 – Present

- Primary engineer on 3-person team – built **agentic AI product** end-to-end: **LangChain** orchestration, **LLM API integration** (Claude, GPT), **LLM-as-a-judge evaluation** pipeline, **vLLM** inference serving; **React** frontend over **Python (FastAPI/Django)** REST APIs
- Designed **gRPC distributed services** with exactly-once delivery and circuit breaker auto-rollback; **PostgreSQL** + **Redis** data layer with query optimization; **99.9% uptime SLO**; multi-AZ **AWS ECS Fargate** with Terraform IaC
- Made product decisions end-to-end – scoped features, defined data contracts, iterated from feedback in a 0→1 environment; **44% infrastructure cost reduction** (\$40–60/mo) through architecture tradeoffs

Google | Software Engineer Intern – Chrome Browser

May 2025 – Aug 2025

- Architected event-driven **TypeScript/React** system with observer pattern and reusable components – decoupled UI state across **25K+ lines** of Chromium; **68% feature delivery acceleration** at **95% test coverage**; shipped to **3B+ active users**
- Designed **C++ IPC transport layer** with **Protocol Buffers** – understood full data path from process boundary to TypeScript surface; both sides of the stack in production at **sub-50ms p99**, **3B+ users**
- Identified p99 bottleneck at 1,200ms; implemented **lock-free concurrent search** eliminating contention – **96% latency reduction**, zero production regressions
- Delivered design documents and drove code reviews with senior Chrome engineers at 95% test coverage

Develop for Good | Software Engineer Intern

May 2024 – Aug 2024

- Built user-facing web application on **AWS** – JWT auth for horizontal scalability; auto-scaling supporting **500+ concurrent users**, **90% deployment time reduction** via CI/CD (GitHub Actions)
- Diagnosed N+1 query bottleneck degrading response to 3s+; redesigned with **PostgreSQL composite indexing** achieving **sub-100ms** for 10,000+ records

PROJECTS

Pulumi – Contributor | Go, TypeScript, Developer Tooling

github.com/pulumi

- Submitted **Go CLI features** for multi-cloud (AWS/Azure/GCP) provisioning – **production developer tooling** shipped to OSS users; under active review by core maintainers
- Analyzed **Raft/Paxos consensus** in distributed state synchronization – studied linearizability and correctness under concurrent operations and partial failures

SKILLS

AI & Agentic: LangChain, LLM APIs (Claude, GPT), vLLM, LLM-as-a-judge evaluation, Agentic orchestration, RAG, PyTorch

Full-Stack: React, TypeScript, Python (FastAPI, Django), JavaScript, REST APIs, gRPC, Protocol Buffers

Languages: TypeScript, Python, Go, C++, Java, JavaScript, SQL, Bash, Rust

Cloud & Infrastructure: AWS (ECS Fargate, EKS, S3, RDS), Terraform, Docker, Kubernetes, CI/CD, CloudWatch, Prometheus, Grafana, GCP

Data & Systems: PostgreSQL, Redis, gRPC, Exactly-once semantics, Circuit breakers, Multi-AZ, Event-driven architecture

AI Dev Tools: Claude Code, GitHub Copilot, Codex, Cursor
