EDUCATION

Georgia State University

Expected May 2027

Bachelor of Science in Computer Science • GPA: 3.75/4.0

- Coursework: Distributed Systems, Operating Systems, Database Systems, Computer Networks, Data Structures
- Honors: Presidential Scholarship, Anita Andrew Fellowship, Roxie Alexander Memorial Award
- Activities: Amazon University Event – BEN Tech Cloud Connect ATL

EXPERIENCE

TiMoto AI | Software Engineer

Sep 2025 – Present

- Primary engineer on 3-person team – designed **gRPC inter-service layer** with exactly-once delivery and circuit breaker auto-rollback; multi-AZ **AWS ECS Fargate** with **Terraform IaC**; **99.9% uptime SLO**; participated in on-call rotation and resolved production incidents via root-cause analysis and runbooks
- Diagnosed and resolved **production deadlock** under concurrent gRPC calls – traced shared resource acquisition conflicts, redesigned call sequencing; **100% evaluation success rate** at **sub-50ms p99**; **44% infrastructure cost reduction** (\$40–60/mo) through architecture tradeoffs
- Built **GenAI-powered productivity tooling** – **vLLM/PagedAttention** inference serving (zero OOM failures at production traffic); **LLM-as-a-judge evaluation pipeline** for automated regression detection; **Claude Code** + **Cursor** daily development workflow; **CloudWatch** + **Prometheus** + **Grafana** observability

Google | Software Engineer Intern – Chrome Browser

May 2025 – Aug 2025

- Designed **C++ IPC transport layer** with **Protocol Buffers** – documented Protobuf vs custom serialization tradeoffs (schema evolution, cross-language compat); shipped to Chrome stable channel serving **3B+ active users** at **sub-50ms p99**
- Identified settings navigation as p99 bottleneck at 1,200ms; designed and implemented **lock-free concurrent trie search** eliminating mutex contention – **96% latency reduction**, zero production regressions
- Architected event-driven **TypeScript/React** system with observer pattern – **68% feature delivery acceleration** across **25K+ lines** of Chromium at **95% test coverage**; delivered design documents and code reviews adopted by senior Chrome engineers

Develop for Good | Software Engineer Intern

May 2024 – Aug 2024

- Designed stateless BaaS on **AWS** (ECS, RDS, S3) – JWT over session auth for horizontal scalability; auto-scaling supporting **500+ concurrent users**; **90% deployment time reduction** via CI/CD (GitHub Actions)
- Diagnosed N+1 query bottleneck degrading response to 3s+; redesigned with **PostgreSQL composite indexing** achieving **sub-100ms** for 10,000+ records

PROJECTS

Pulumi – Contributor | Go, TypeScript, Infrastructure-as-Code

github.com/pulumi

- Submitted **Go CLI features** for multi-cloud (AWS/Azure/GCP) provisioning – open-source developer tooling under active review by core maintainers
- Analyzed **Raft/Paxos consensus** in distributed state synchronization – studied linearizability guarantees and correctness under concurrent operations and partial failures

SKILLS

Distributed Systems: gRPC, Protocol Buffers, Exactly-once semantics, Circuit breakers, Multi-AZ, Fault tolerance, Event-driven architecture, Kafka

Cloud & Infrastructure: AWS (ECS Fargate, EKS, EC2, S3, RDS), Terraform, Kubernetes, Docker, CI/CD (GitHub Actions), CloudWatch, Prometheus, Grafana

ML & AI Infrastructure: vLLM, PagedAttention, Continuous Batching, LangChain, LLM-as-a-judge evaluation, LLM APIs (Claude, GPT)

Languages: C++, Python, Go, TypeScript, Java, JavaScript, SQL, Bash, Rust

Frameworks & Databases: FastAPI, Django, Node.js, React, REST APIs, PostgreSQL, Redis, MongoDB

AI Dev Tools: Claude Code, GitHub Copilot, Codex, Cursor
