EDUCATION

Georgia State University

Expected May 2027

Bachelor of Science in Computer Science • GPA: 3.75/4.0

- Coursework: Distributed Systems, Operating Systems, Database Systems, Computer Networks, Data Structures
- Honors: Presidential Scholarship, Anita Andrew Fellowship, Roxie Alexander Memorial Award

EXPERIENCE

TiMoto AI | Software Engineer

Sep 2025 – Present

- Designed **gRPC inter-service layer** with exactly-once delivery – traced production deadlock to shared resource acquisition conflicts under concurrent load; redesigned call sequencing; **100% evaluation success rate at sub-50ms p99**; primary engineer on 3-person team owning backend, infra, and ML end-to-end
- Architected **multi-AZ AWS ECS Fargate** with **Terraform IaC**, circuit breaker pattern, and auto-rollback on health check failure – **99.9% uptime SLO**; CloudWatch + Prometheus/Grafana observability; on-call rotation, root-cause analysis, runbooks, post-mortem; **44% infrastructure cost reduction** (\$40–60/mo)
- Deployed **vLLM with PagedAttention** for production ML serving – solved KV cache memory fragmentation under concurrent inference load; continuous batching throughput optimization; benchmarked vs. naive HF inference on throughput, p99, and memory utilization; **zero OOM failures**
- Built **LLM-as-a-judge evaluation pipeline** with **LangChain** orchestration + Claude/GPT LLM APIs – automated regression detection before deployment; replaced manual review with continuous quality enforcement; zero production regressions

Google | Software Engineer Intern – Chrome Browser

May 2025 – Aug 2025

- Identified settings navigation as **p99 bottleneck at 1,200ms**; profiled critical path; designed and implemented **lock-free concurrent trie search** with **CAS operations** eliminating mutex contention – **96% latency reduction**, zero production regressions; design adopted by senior Chrome engineers
- Designed **C++ IPC transport layer** with **Protocol Buffers** at Google's security review standard – evaluated Protobuf vs. custom serialization (schema evolution, memory safety, cross-language compatibility); shipped to Chrome stable serving **3B+ active users** at **sub-50ms p99**; **95% test coverage**; zero production regressions
- Architected event-driven **TypeScript/React** system with observer pattern – **68% feature delivery acceleration** across **25K+ lines** of Chromium at **95% test coverage**

Develop for Good | Software Engineer Intern

May 2024 – Aug 2024

- Designed stateless **BaaS on AWS** – selected **JWT** over session auth for stateless horizontal scalability; auto-scaling supporting **500+ concurrent users**; **90% deployment time reduction** via CI/CD (**GitHub Actions**)
- Diagnosed N+1 query bottleneck degrading response to 3s+; redesigned with **PostgreSQL composite indexing** achieving **sub-100ms** for 10,000+ records

PROJECTS

Pulumi – Contributor | Go, TypeScript, Multi-Cloud IaC

github.com/pulumi

- Submitted **Go CLI features** for multi-cloud (AWS/Azure/GCP) provisioning – open-source developer tooling under active review by core maintainers; 24.4K+ star project
- Analyzed **Raft/Paxos consensus** in distributed state synchronization – studied linearizability guarantees and correctness under concurrent operations and partial failures

SKILLS

Distributed Systems: gRPC, Protocol Buffers, Exactly-once semantics, Circuit breakers, Multi-AZ, Fault tolerance, Raft/Paxos, Event-driven architecture

Languages: C++, Go, Python, Rust, TypeScript, Java, JavaScript, SQL, Bash

Cloud & Infrastructure: AWS (ECS Fargate, EKS, EC2, S3, RDS), Terraform, **Kubernetes**, Docker, CI/CD (GitHub Actions), CloudWatch, Prometheus, Grafana, GCP

ML & AI Infrastructure: vLLM, PagedAttention, Continuous Batching, LLM-as-a-judge evaluation, LangChain, PyTorch, LLM APIs (Claude, GPT)

Frameworks & Databases: FastAPI, Django, Node.js, React, REST APIs, PostgreSQL, Redis, MongoDB

AI Dev Tools: Claude Code, GitHub Copilot, Codex, Cursor
