EDUCATION

Georgia State University

Expected May 2027

Bachelor of Science in Computer Science • **GPA: 3.75/4.0**

- Coursework: Distributed Systems, Operating Systems, Database Systems, Computer Networks, Data Structures
- Honors: Presidential Scholarship, Anita Andrew Fellowship, Roxie Alexander Memorial Award
- Activities: Amazon University Event – BEN Tech Cloud Connect ATL

EXPERIENCE

TiMoto AI | Software Engineer

Sep 2025 – Present

- Architected multi-AZ ECS Fargate with **Terraform IaC**, CloudWatch and Prometheus/Grafana observability, and circuit breaker pattern — **99.9% uptime**, **44% cost reduction** (\$40–60/month); auto-rollback on health check failure; on-call rotation with runbooks and post-mortem documentation; primary engineer on 3-person team
- Built **LLM-as-a-judge evaluation pipeline** integrating AI tooling into CI loop — automated quality scoring, calibrated regression detection, enabled high-frequency low-risk model releases
- Designed **gRPC inter-service layer with exactly-once semantics**; resolved production deadlock via root-cause analysis and call-sequencing redesign — **100% evaluation success rate** at **sub-50ms p99**
- Architected **vLLM inference engine with PagedAttention** — deployed with continuous batching achieving **zero OOM failures** at production traffic

Google | Software Engineer Intern — Chrome Browser

May 2025 – Aug 2025

- Designed **C++ IPC transport layer** with Protocol Buffers for reliability and schema evolution — shipped to Chrome stable channel serving **3B+ active users** at **sub-50ms p99**; code reviewed by senior Chrome engineers at **95% test coverage**
- Profiled settings navigation bottleneck at p99 1,200ms; implemented **lock-free concurrent trie search (CAS)** — **96% latency reduction**, zero production regressions
- Architected event-driven TypeScript/React system with observer pattern — accelerated developer feature delivery **68%** across **25K+ lines** of Chromium codebase
- Partnered with Chrome infrastructure team to produce design documents; led code reviews for platform improvements adopted into production branch

Develop for Good | Software Engineer Intern

May 2024 – Aug 2024

- Built **CI/CD pipeline** with GitHub Actions enabling automated testing and deployments — **90% reduction in deployment time**; designed stateless BaaS on AWS with JWT auth supporting **500+ concurrent users**
- Diagnosed N+1 query bottleneck at 3s+; redesigned with PostgreSQL indexing achieving **sub-100ms** for 10,000+ records

PROJECTS

Pulumi – Contributor | *Go, TypeScript, Infrastructure-as-Code (IaC)*

github.com/pulumi

- Contributed **Go CLI features and bug fixes** enabling multi-cloud (AWS/Azure/GCP) provisioning — open-source developer tooling under active review by core maintainers
- Analyzed **Raft/Paxos consensus** in distributed state synchronization layer — studied linearizability guarantees and correctness under concurrent operations and partial failures

SKILLS

Cloud & Infrastructure: AWS (ECS Fargate, EKS, EC2, S3, RDS), Terraform, K8s, Docker, CI/CD, CloudWatch, Prometheus, Grafana, GCP

Distributed Systems: gRPC, Protocol Buffers, Circuit breakers, Exactly-once semantics, Fault tolerance, Kafka, Multi-AZ, Event-driven architecture

Languages: Go, C++, Python, TypeScript, Java, JavaScript, SQL, Bash, Rust

ML & AI Infrastructure: vLLM, PagedAttention, Continuous Batching, LLM-as-a-judge evaluation, LangChain, PyTorch, LoRA/QLoRA

Frameworks & Databases: FastAPI, Django, Node.js, React, REST APIs, PostgreSQL, Redis, MongoDB

AI Dev Tools: Claude Code, GitHub Copilot, Codex, Cursor
