EDUCATION

Georgia State University

Expected May 2027

Bachelor of Science in Computer Science • **GPA: 3.75/4.0**

- Coursework: Distributed Systems, Operating Systems, Database Systems, Computer Networks, Data Structures
- Honors: Presidential Scholarship, Anita Andrew Fellowship, Roxie Alexander Memorial Award
- Activities: Amazon University Event – BEN Tech Cloud Connect ATL

EXPERIENCE

TiMoto AI | Software Engineer

Sep 2025 – Present

- Led backend, cloud infrastructure, and ML serving for a 3-person engineering team — designed, deployed, and operated distributed production systems end-to-end with **SRE ownership**: on-call rotation, runbooks, post-mortem process
- Architected **multi-AZ ECS Fargate** with Terraform IaC, **CloudWatch + Prometheus/Grafana** observability, and circuit breaker pattern — **99.9% uptime SLO**, **44% cost reduction** (\$40–60/month); auto-rollback on health check failure
- Designed and maintained **gRPC inter-service layer**; resolved production deadlock under concurrent calls by tracing shared resource conflicts — **100% evaluation success rate** at **sub-50ms p99**
- Operated vLLM inference engine under production traffic — monitored KV cache utilization, resolved OOM conditions via continuous batching optimization, **zero OOM failures** at sustained load
- Triaged and resolved production incidents via root-cause analysis; documented runbooks; applied post-mortem learnings to prevent recurrence; participated in on-call rotation

Google | Software Engineer Intern — Chrome Browser

May 2025 – Aug 2025

- Designed **C++ IPC transport layer** with Protocol Buffers — shipped to Chrome stable channel serving **3B+ active users** at **sub-50ms p99**, **10K+ req/sec**; **zero production regressions**
- Identified settings navigation as p99 bottleneck at 1,200ms; designed and implemented **lock-free concurrent trie search** eliminating mutex contention — **96% latency reduction**
- Delivered code at **95% test coverage** across **25K+ lines** of Chromium; participated in design reviews with Chrome infrastructure team; changes adopted into production branch
- Architected event-driven TypeScript/React system with observer pattern — accelerated feature delivery **68%** while maintaining zero production incidents

Develop for Good | Software Engineer Intern

May 2024 – Aug 2024

- Designed stateless BaaS on AWS — auto-scaling policy supporting **500+ concurrent users**; implemented **CI/CD via GitHub Actions** reducing deployment time **90%** (toil elimination)
- Diagnosed N+1 query bottleneck degrading response to 3s+; redesigned with PostgreSQL indexing achieving **sub-100ms** for 10,000+ records

PROJECTS

Pulumi — Contributor | Go, TypeScript, Infrastructure-as-Code (IaC)

github.com/pulumi

- Submitted Go CLI features and bug fixes enabling multi-cloud (AWS/Azure/GCP) provisioning — under active review by core maintainers
- Analyzed Raft/Paxos consensus in distributed state synchronization layer — studied linearizability and correctness under concurrent operations and partial failures

SKILLS

Cloud & Infrastructure: AWS ECS Fargate, Kubernetes, Terraform, Docker, CI/CD, CloudWatch, Prometheus, Grafana, AWS (EKS, EC2, S3, RDS), GCP

Distributed Systems: Circuit breakers, Multi-AZ, Fault tolerance, gRPC, Protocol Buffers, Exactly-once semantics, Kafka, Event-driven architecture

Languages: C++, Python, Go, TypeScript, Java, JavaScript, SQL, Bash, Rust

ML & AI Infrastructure: vLLM, PagedAttention, Continuous Batching, LoRA/QLoRA, PyTorch, LangChain, LLM-as-a-judge evaluation

Frameworks & Databases: Django, FastAPI, Node.js, React, REST APIs, PostgreSQL, Redis, MongoDB

AI Dev Tools: Claude Code, GitHub Copilot, Codex, Cursor
