## EDUCATION

### Georgia State University

Expected May 2027

Bachelor of Science in Computer Science • **GPA: 3.75/4.0**

- Coursework: Distributed Systems, Operating Systems, Database Systems, Computer Networks, Data Structures
- Honors: Presidential Scholarship, Anita Andrew Fellowship, Roxie Alexander Memorial Award

## EXPERIENCE

### TiMoto AI | Software Engineer

Sep 2025 – Present

- Built **Agentic AI evaluation pipeline** using **LangChain** orchestration + **Generative AI** APIs (Claude, GPT) – automated deployment decisions via **LLM-as-a-judge** quality gates; zero production regressions; replaced manual review with continuous enforcement; primary engineer on 3-person team
- Deployed **vLLM with PagedAttention** for production **LLM serving** – model deployment + KV cache optimization under concurrent load; **zero OOM failures**; continuous batching throughput; CloudWatch + Prometheus/Grafana ML observability
- Designed **gRPC inter-service layer** (Go/Python) with **exactly-once semantics** – traced production deadlock to shared resource acquisition conflicts; redesigned call sequencing; **100% evaluation success rate at sub-50ms p99**; **FastAPI + Django** REST layer
- Architected **multi-AZ AWS ECS Fargate** with **Terraform IaC**, circuit breaker pattern, and auto-rollback – **99.9% uptime SLO**; on-call rotation, root-cause analysis, runbooks, post-mortem; **44% infrastructure cost reduction** (\$40–60/mo)

### Google | Software Engineer Intern – Chrome Browser

May 2025 – Aug 2025

- Designed **C++ IPC transport layer** with **Protocol Buffers** at **Google's security review standard** – evaluated Protobuf vs. custom serialization for memory safety, backwards-compatibility, and cross-language support; shipped to Chrome stable serving **3B+ active users at sub-50ms p99**; **95% test coverage**; zero production regressions
- Profiled settings navigation at 1,200ms p99; implemented **lock-free concurrent trie search** with **CAS operations** eliminating mutex contention – **96% latency reduction**, zero regressions; adopted by senior Chrome engineers
- Architected event-driven **TypeScript/React** system with observer pattern – **68% feature delivery acceleration** across **25K+ lines** of Chromium at **95% test coverage**

### Develop for Good | Software Engineer Intern

May 2024 – Aug 2024

- Designed stateless **BaaS on AWS** – selected **JWT** over session auth for stateless horizontal scalability; auto-scaling supporting **500+ concurrent users**; **90% deployment time reduction** via CI/CD (**GitHub Actions**)
- Diagnosed N+1 query bottleneck degrading API response to 3s+ on large datasets; redesigned with **PostgreSQL composite indexing** achieving **sub-100ms** for 10,000+ records

## PROJECTS

### Pulumi – Contributor | Go, TypeScript, Multi-Cloud IaC

[github.com/pulumi](https://github.com/pulumi)

- Submitted **Go CLI features** for multi-cloud (AWS/Azure/GCP) provisioning – open-source developer tooling under active review by core maintainers; 24.4K+ star project
- Analyzed **Raft/Paxos consensus** in distributed state synchronization – studied linearizability guarantees and correctness under concurrent operations and partial failures

## SKILLS

**ML & AI Infrastructure:** Generative AI, Agentic AI (LangChain), vLLM, LLM-as-a-judge evaluation, PagedAttention, Continuous Batching, LLM APIs (Claude, GPT), PyTorch

**Languages:** Python, Go, C++, TypeScript, JavaScript, Java, Rust, SQL, Bash

**Cloud & Infrastructure:** AWS (ECS Fargate, EKS, EC2, S3, RDS), GCP, Terraform, Kubernetes, Docker, CI/CD (GitHub Actions), CloudWatch, Prometheus, Grafana

**Distributed Systems:** gRPC, Protocol Buffers, Exactly-once semantics, Circuit breakers, Multi-AZ, Fault tolerance, Event-driven architecture

**Frameworks & APIs:** FastAPI, Django, React, Node.js, REST APIs, PostgreSQL, Redis, MongoDB, HTML/CSS

**AI Dev Tools:** Claude Code, GitHub Copilot, Codex, Cursor
