EDUCATION

Georgia State University

Expected May 2027

Bachelor of Science in Computer Science • GPA: 3.75/4.0

- Coursework: Distributed Systems, Operating Systems, Database Systems, Computer Networks, Data Structures
- Honors: Presidential Scholarship, Anita Andrew Fellowship, Roxie Alexander Memorial Award

EXPERIENCE

TiMoto AI | Software Engineer

Sep 2025 – Present

- Built **Agentic AI workflow automation** with **LangChain + LLM-as-a-judge** quality gates – automated deployment decisions with no human in the loop; **zero production regressions**; moved from manual review to continuous automated enforcement in weeks; primary engineer on 3-person team
- Reduced infrastructure cost by **44%** (\$40–60/mo) – architected **multi-AZ AWS ECS Fargate** with **Terraform IaC**, circuit breaker pattern, and auto-rollback; identified wasteful resource allocation, redesigned provisioning, measured impact; **99.9% uptime SLO**
- Designed **gRPC inter-service layer (Go/Python)** – traced production deadlock causing 100% failure rate; redesigned call sequencing; **100% success rate** at **sub-50ms p99** within days of identifying the bottleneck
- Deployed **vLLM with PagedAttention** – production **LLM serving** with KV cache optimization; built **Prometheus/Grafana + CloudWatch** observability to track model performance vs. cost in real time; **zero OOM failures**

Google | Software Engineer Intern – Chrome Browser

May 2025 – Aug 2025

- Eliminated 1,200ms p99 bottleneck in Chrome settings search – profiled, identified mutex contention, implemented **lock-free concurrent trie** with **CAS operations**; **96% latency reduction** with zero regressions; shipped to **3B+ users**; design adopted by senior Chrome engineers
- Shipped **C++ IPC transport layer** with **Protocol Buffers** – evaluated serialization options for memory safety, backwards-compatibility, cross-language support; **95% test coverage**; zero production regressions at Chrome scale
- Architected event-driven **TypeScript/React** system – **68% feature delivery acceleration** across **25K+ lines** of Chromium; measurable improvement to team throughput at **95% test coverage**

Develop for Good | Software Engineer Intern

May 2024 – Aug 2024

- Cut deployment time by **90%** via CI/CD (**GitHub Actions**) – identified manual release bottleneck, automated the pipeline; auto-scaling BaaS on AWS supporting **500+ concurrent users**
- Reduced API response from 3s+ to **sub-100ms** for 10,000+ records – diagnosed N+1 query bottleneck, redesigned with **PostgreSQL composite indexing**

PROJECTS

Pulumi – Open Source Contributor | Go, TypeScript, Multi-Cloud IaC

github.com/pulumi

- Shipped **Go CLI features** for multi-cloud (AWS/Azure/GCP) provisioning – open-source infrastructure tooling with measurable developer impact; 24.4K+ star project; prototyped and submitted in days
- Analyzed **Raft/Paxos consensus** in distributed state synchronization – correctness under concurrent operations and partial failures

SKILLS

ML & AI Infrastructure: Agentic AI (LangChain), LLM-as-a-judge evaluation, Generative AI, vLLM, PagedAttention, LLM APIs (Claude, GPT), PyTorch

Languages: Python, Go, C++, TypeScript, JavaScript, Java, Rust, SQL, Bash

Frameworks & APIs: FastAPI, Django, React, Node.js, REST APIs, PostgreSQL, Redis, MongoDB, HTML/CSS

Cloud & Infrastructure: AWS (ECS Fargate, EKS, EC2, S3, RDS), GCP, Terraform, Kubernetes, Docker, CI/CD (GitHub Actions), CloudWatch, Prometheus, Grafana

Distributed Systems: gRPC, Protocol Buffers, Exactly-once semantics, Circuit breakers, Multi-AZ, Fault tolerance, Event-driven architecture

AI Dev Tools: Claude Code, Cursor, GitHub Copilot, Codex
