EDUCATION

Georgia State University

Expected May 2027

Bachelor of Science in Computer Science • GPA: 3.75/4.0

- Coursework: Distributed Systems, Operating Systems, Database Systems, Computer Networks, Data Structures
- Honors: Presidential Scholarship, Anita Andrew Fellowship, Roxie Alexander Memorial Award

EXPERIENCE

TiMoto AI | Software Engineer

Sep 2025 – Present

- Built **AI/RAG pipeline** with **LangChain** orchestration + **LLM-as-a-judge** quality gates – autonomous decision engine using **Claude/GPT** with retrieval-augmented generation; zero production regressions; primary engineer on 3-person team
- Designed **FastAPI** + **Django** REST layer with **PostgreSQL** backend – traced production deadlock to resource acquisition conflicts; redesigned call sequencing; **100% success rate** at **sub-50ms p99**; full CI/CD via **GitHub Actions**
- Architected **multi-AZ AWS ECS Fargate** with **Terraform IaC** and auto-rollback – **99.9% uptime SLO**; **44% infrastructure cost reduction** (\$40–60/mo); **Prometheus/Grafana** + **CloudWatch** observability stack
- Deployed **vLLM with PagedAttention** for production LLM serving – KV cache optimization, continuous batching, **zero OOM failures**; built with **Claude Code** + **Cursor** across architecture and iteration

Google | Software Engineer Intern – Chrome Browser

May 2025 – Aug 2025

- Architected event-driven **TypeScript/React** internal dashboard system with observer pattern across **25K+ lines** of Chromium – **68% feature delivery acceleration** at **95% test coverage**; shipped to **3B+ active users**
- Profiled settings navigation at 1,200ms p99; designed **lock-free concurrent trie search** with **CAS operations** eliminating mutex contention – **96% latency reduction**, zero regressions; adopted by senior Chrome engineers
- Designed **C++ IPC transport layer** with **Protocol Buffers** – evaluated Protobuf vs. custom serialization for memory safety and cross-language support; **sub-50ms p99**; **95% test coverage**; zero production regressions

Develop for Good | Software Engineer Intern

May 2024 – Aug 2024

- Built **Python** backend with **PostgreSQL** – diagnosed N+1 query bottleneck; redesigned with composite indexing; **sub-100ms** API response for 10,000+ records; **90% deployment time reduction** via **GitHub Actions** CI/CD
- Designed stateless **BaaS on AWS** – **JWT** auth, auto-scaling to **500+ concurrent users**, **RESTful APIs** serving data visualization dashboards for nonprofit clients

PROJECTS

Pulumi – Open Source Contributor | Go, TypeScript, Multi-Cloud IaC

github.com/pulumi

- Submitted **Go CLI features** for multi-cloud (AWS/Azure/GCP) provisioning – open-source tooling under review by core maintainers; 24.4K+ star project
- Analyzed **Raft/Paxos consensus** in distributed state synchronization – linearizability guarantees and correctness under concurrent operations

SKILLS

Languages: Python, TypeScript, JavaScript, Go, C++, Java, Rust, **SQL**, Bash

Frameworks & APIs: FastAPI, Django, React, Node.js, REST APIs, **PostgreSQL**, Redis, MongoDB, HTML/CSS

Cloud & Infrastructure: AWS (ECS Fargate, EKS, EC2, S3, RDS), GCP, Terraform, K8s, Docker, CI/CD (GitHub Actions), CloudWatch, Prometheus, Grafana

Distributed Systems: gRPC, Protocol Buffers, Exactly-once semantics, Circuit breakers, Multi-AZ, Fault tolerance, Event-driven architecture

ML & AI Infrastructure: LangChain, RAG (Retrieval-Augmented Generation), LLM-as-a-judge evaluation, vLLM, PagedAttention, LLM APIs (Claude, GPT), PyTorch

AI Dev Tools: Claude Code, Codex, Cursor, GitHub Copilot
