EDUCATION

Georgia State University

Expected May 2027

Bachelor of Science in Computer Science • GPA: 3.75/4.0

- Coursework: Distributed Systems, Operating Systems, Database Systems, Computer Networks, Data Structures
- Honors: Presidential Scholarship, Anita Andrew Fellowship, Roxie Alexander Memorial Award

EXPERIENCE

TiMoto AI | Software Engineer

Sep 2025 – Present

- Architected **multi-AZ AWS ECS Fargate + EKS** with **Terraform IaC**, **event-driven async processing**, circuit breakers, and auto-rollback – **99.9% uptime SLO**; **44% infra cost reduction**; primary engineer on 3-person team
- Designed **FastAPI + Django** REST layer with **gRPC** inter-service layer (**Go/Python**) – traced production deadlock to resource acquisition conflicts; redesigned call sequencing; **100% success rate** at **sub-50ms p99**
- Built **agentic AI pipeline** with **LangChain + LLM-as-a-judge** quality gates – autonomous deployment decision engine via **Claude/GPT**; zero production regressions; **GitHub Actions** CI/CD with staged rollouts
- Deployed **vLLM with PagedAttention** for production LLM serving – full observability via **Prometheus**, **Grafana**, and **CloudWatch**; **zero OOM failures**; built with **Claude Code + Cursor**

Google | Software Engineer Intern – Chrome Browser

May 2025 – Aug 2025

- Architected event-driven **TypeScript** system with observer pattern across **25K+ lines** of Chromium – **68% feature delivery acceleration** at **95% test coverage**; shipped to **3B+ active users**
- Profiled settings navigation at 1,200ms p99; designed **lock-free concurrent trie search** with **CAS operations** eliminating mutex contention – **96% latency reduction**, zero regressions; adopted by senior Chrome engineers
- Designed **C++ IPC transport layer** with **Protocol Buffers** – evaluated serialization strategies for memory safety and cross-language support; **sub-50ms p99**; **95% test coverage**

Develop for Good | Software Engineer Intern

May 2024 – Aug 2024

- Designed stateless **BaaS on AWS** (EC2, S3, RDS) with **JWT** auth, auto-scaling to **500+ concurrent users**, **90% deployment time reduction** via **GitHub Actions** CI/CD
- Diagnosed N+1 query bottleneck in **Python** backend; redesigned with **PostgreSQL composite indexing** – **sub-100ms** API response for 10,000+ records

PROJECTS

Pulumi – Open Source Contributor | *Go, TypeScript, Multi-Cloud IaC*

github.com/pulumi

- Submitted **Go CLI features** for multi-cloud (AWS/Azure/GCP) provisioning – open-source tooling under review by core maintainers; 24.4K+ star project
- Analyzed **Raft/Paxos consensus** in distributed state synchronization – linearizability guarantees and correctness under concurrent operations

SKILLS

Languages: Go, Python, TypeScript, JavaScript, C++, Java, Rust, **SQL**, Bash

Cloud & Infrastructure: AWS (ECS Fargate, EKS, EC2, S3, RDS), GCP, Terraform, K8s, Docker, CI/CD (GitHub Actions), CloudWatch

Observability: Prometheus, Grafana, CloudWatch, distributed tracing, alerting pipelines

Frameworks & APIs: FastAPI, Django, gRPC, Protocol Buffers, REST APIs, **PostgreSQL**, Redis, MongoDB

Distributed Systems: Event-driven architecture, Exactly-once semantics, Circuit breakers, **Async processing**, Multi-AZ, Fault tolerance

ML & AI Infrastructure: LangChain, LLM-as-a-judge evaluation, vLLM, PagedAttention, LLM APIs (Claude, GPT), PyTorch

AI Dev Tools: Claude Code, Codex, Cursor, GitHub Copilot
