EDUCATION

Georgia State University

Expected May 2027

Bachelor of Science in Computer Science • GPA: 3.75/4.0

- Coursework: Distributed Systems, Operating Systems, Database Systems, Computer Networks, Data Structures & Algorithms
- Honors: Presidential Scholarship, Anita Andrew Fellowship, Roxie Alexander Memorial Award

EXPERIENCE

TiMoto AI | Software Engineer

Sep 2025 – Present

- Built **LLM-as-a-judge model evaluation pipeline** with **LangChain** orchestration – autonomous quality gating for production deployments via **Claude/GPT**; zero production regressions; primary engineer on 3-person team
- Deployed **vLLM with PagedAttention** for production ML serving – KV cache optimization, continuous batching, concurrent inference under production load; **zero OOM failures**; **Prometheus/Grafana** + **CloudWatch** observability
- Designed **Python FastAPI + gRPC** data processing and inter-service layer – traced production deadlock to resource acquisition conflicts; redesigned call sequencing; **100% success rate** at **sub-50ms p99**
- Architected **multi-AZ AWS ECS Fargate + EKS** with **Terraform IaC** and auto-rollback – **99.9% uptime SLO**; **44% infrastructure cost reduction**

Google | Software Engineer Intern – Chrome Browser

May 2025 – Aug 2025

- Designed **C++ IPC transport layer** with **Protocol Buffers** – schema evolution, cross-language compatibility, **sub-50ms p99** at **10K+ req/sec**; shipped to Chrome stable serving **3B+ active users**; **95% test coverage**
- Identified p99 navigation bottleneck at 1,200ms; designed **lock-free concurrent trie search** with **CAS operations** – **96% latency reduction**, zero regressions; adopted by senior Chrome engineers
- Architected event-driven **TypeScript** system with observer pattern across **25K+ lines** of Chromium – **68% feature delivery acceleration** at **95% test coverage**

Develop for Good | Software Engineer Intern

May 2024 – Aug 2024

- Designed stateless **BaaS on AWS** – auto-scaling to **500+ concurrent users**, **90% deployment time reduction** via **GitHub Actions CI/CD**
- Diagnosed N+1 query bottleneck; redesigned with **PostgreSQL composite indexing** – **sub-100ms** for 10,000+ records; built full **data processing pipeline** for nonprofit analytics

PROJECTS

Pulumi – Open Source Contributor | Go, TypeScript, Multi-Cloud IaC

github.com/pulumi

- Submitted **Go CLI features** for multi-cloud (AWS/Azure/GCP) provisioning – open-source tooling under review by core maintainers; 24.4K+ star project
- Analyzed **Raft/Paxos consensus** in distributed state synchronization – linearizability guarantees and correctness under concurrent operations

SKILLS

Languages: Python, Go, TypeScript, JavaScript, C++, Java, Rust, **SQL**, Bash

ML & AI Infrastructure: vLLM, PagedAttention, LLM-as-a-judge evaluation, LangChain, model deployment, model optimization, data processing pipelines, LLM APIs (Claude, GPT), PyTorch

Cloud & Infrastructure: AWS (ECS Fargate, EKS, EC2, S3, RDS), GCP, Terraform, K8s, Docker, CI/CD (GitHub Actions), CloudWatch, Prometheus, Grafana

Distributed Systems: gRPC, Protocol Buffers, Event-driven architecture, Circuit breakers, Exactly-once semantics, Multi-AZ, Fault tolerance

Frameworks & APIs: FastAPI, Django, React, Node.js, REST APIs, PostgreSQL, Redis, MongoDB

AI Dev Tools: Claude Code, Codex, Cursor, GitHub Copilot
